## INTRODUCTION

With about 4 years of experience in the field as a Frontend (and Fullstack) developer, I've worked on important projects in all phases of the software development lifecycle, from business requirements collection to project delivery. I also have developed a business perspective mindset ever since I started to work, always focused on adding value to the company.

Yet in college, I started developing hard problem solving skills in programming marathons. I've always appreciated good challenges, specially when working with a team, where I always wanted to learn in depth to become proficient in my role as a developer.

I'm motivated about the whole software development process, management and what it includes. However, my favorite part is the coding. I'm furthermore interested in hearing from colleagues and managers to learn something new, I also enjoy sharing my experiences with them, in my opinion, that makes me more engaged.

At the present time, I'm living at Aparecida de Goiânia, Goiás - Brazil. I'm also a pianist, desiring to know different places in the world and to eat good hamburgers.

## EXPERIENCE

### NECTAR CRM (DEC 2018 - CURRENT)
